BUFFALO LITHIA WATER.

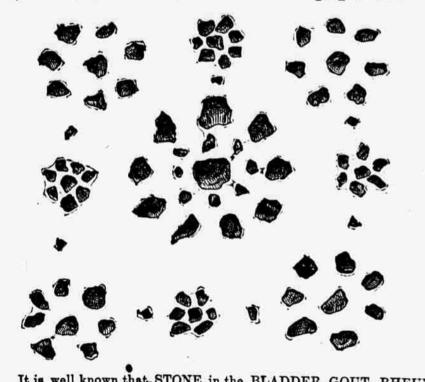

A Powerful and the only Known Solvent of Stone in the Bladder TESTIMONIALS WHICH DEFY IMPUTATION OR QUESTION:

DR. JOHN HERBERT CLAIBORNE

of Petersburg, Va., ex-President and Honorary Fellow Medical Society of Virginia, in a letter dated Sept. 3, 1892, to Dr. E. C. Laird. Resident Physician at the Springs, says:

"I send by this mail a box of Calculi, passed at various times within the last year by the Hon. T. J. Jarratt, our former Mayor, while drinking the Buffalo Lithia Water. They give him but little pain now when passing. I have never critically examined the broken Calculi, passed in such quantities from Mr Jarratt's bladder, but am under the impression that the most of them are magnesian phosphates. There were specimens, however, which presented the appearance of oxalates, and, I remember, impressed me specially as being uric acid. I do not pretend to account for the mode of their solution by the Buffalo Lithia Water. There is nothing in its analysis which would warrant such results; but the results are there, and seeing is believing. I can only suppose that in Nature's alembic there has been some subtle solvent evolved, too subtle to be caught by our coarse re-agents, which make this wonderful disintegration. 'There are many things in heaven and earth not dreamt of in our philosophy,' and his is a short creed who only believes what he can prove or explain."

The following plate is from a photograph, and represents the exact size and shape of the Calculi referred to by Dr. Claiborne in the foregoing statement:

Dr. C. H. DAVIS of Meriden, Conn., in the "New England Medical Monthly" for July, 1890. See page 469 of that Journal.

"Mr. R. L. Roys of this city consulted me about two years ago for Stone in the Bladder, from which he hal been suffering for a number of years. On my suggestion he commenced the use of Buffalo Lithia of Danbury, Conn., to the New England Medical Water, as he was very much opposed to operative interference. After using the water for a short time, disintegration to a certain extent took place, and large quantities of stone were passed. For several days in succession he passed as much as a teaspoonful of the debris, and at intervals for a considerable period he and represents some of the largest specimens of **Two** passed large quantities, and under the continued use of the Water there was a constant passage of Calculi until he was entirely relieved of his trouble.

"The photograph sent herewith is a correct representation, and exact size, of some of the largest specimens of Calculi discharged by Mr. Roys. A chemical and microscopical analysis showed that they are Uric Acid with a trace of the Oxalate of Lime."

Dr. B. J. WEISTLING of Middletown. Pa., states as follows:

"Experience in its use in Stone in the Bladder, in my own person, enables me to attest the efficacy of the Buffalo Lithia Water in this painful malady. After having been subjected to sufferings, the intensity of which cannot be described, I have, under the influence of the Water, passed an ounce of Calculi (Uric Acid), some of which weighed as much as four grains, affording inexpressible relief, and leaving me in a condition of comparative ease and comfort.

'On one occasion I passed thirty-five Calculi in forty-eight hours. The appearance of this Calculus Nuclei indicates unmistakably, I think, that they were all component particles of one large Calculus, destroyed by the action of the Water.

The above plate is from a photograph, and represents the exact size and shape of some of the Calculi passed by Dr. Weistling. They were preserved by his son, Dr. J. Weir Weistling.

The following plate is from a photograph which forms & part of a communication of Dr. GEORGE H. PIERCE Monthly for November, 1890 (see page 76 of that journal). Ounces and Twenty-seven Grains of Dissolved Stone discharged by a Patient designated as "Mr. S.." under the action of

YELLED AT GOV. RUSSELL. REBELLIOUS CONVICTS AT

CHARLESTOWN PRISON. A Salute to the Governor When He Left the Prison and After He Had Seen the Men Go to Dinner—Thinks the Threatened Revolt Would Have Ended in Slaughter.

BOSTON, March 8.-Yells from 700 convicts were the parting salute to Gov. Russell as he left the State prison to-day. It did not take long for them to searn that the Governor was instrumental in locking them in the cells and causing a search of the cells to be made for back from Washington last night, was at the institution at 5 o'clock this morning and inspected the men as they filed past him for reakfast. They seemed very glad of his return, and even manifested their feelings in outward signs. Some of the uproarious ones made a noise and cheered. This demonstration was evidently not to the liking of the most of the prisoners, who saw in this a further cur-

nor as his superior, and would have all orders successor had been appointed, and felt like a free man. Gov. Russell and Gen. Bridges, the new Warden, arrived at the prison at 11% o'clock and held a short consultation with the Warden. The Governor and Warden Lovering went to the rotunda, where they sat alone discussing affairs, when the dinner gong rang. The convicts filed along the corridors in wing to dinner. They cast interested diances at the two men. Gov. Russell has given over the control of the institution temporarily to Warden Lovering. Soon after the noon hour Gov. Russell left the prison, secompanied by Gen. Bridges, and then the sainte was given. Gen. Bridges says he will not accept the post unless he has full control. He will not take charge if he is to be interfered with by the Prison tommissioners. It is said at the State House that there is no doubt that he will have absolute control. He accepted a blank bond this morning, which he will be expected to fill out and sign before he is inducted into office.

The search of the sheds was prosecuted with the usual victor and thoroughness this morning. The repair shop, bed shot, brush shop, stock room, and lumber room have been ransacked. In the rotair shop was found a jaci, and in the bed shop six lack saws. Some bindgeons were discovered, and the officers got light on the way in which revolvers were smuggled into the prison walls. A piece of joist was cut open and inside there was found a revolver. From what appeared to be a can of tomatoes, all nicely labelled and done up to look like the real article, were taken out a pair of pincers and a small hand saw, and in a loaf cake received by a prisoner from an affectionate sister were a small hand saw, and wedge.

tionate sister were a small hand saw and wedge.

As soon as the Governor left, one convicts began to insult the officers. This they have done at intervals since yesterday morning. They seemed at first to have no fear of solitary confinement. Gov. hussell said that the Executive Council would confirm Gen. Bridges to-morrow, with full the power that he asks. "They can now see," said his Excellency, what the present system has led to, and the sooner it is relegated to the rear the better. Now is the time to take a firm stand and insist on discipline, and that is just as necessary smong the officers as among the convicts. The latter have been too well treated, and I don't wonder that the people were beginning to fear an uprising that would have out one meaning—wholesale slaughter. I have made up my mind that a new leaf must be turned over, it the whole militia force is needed to do it.

"The exhibition of ta-day was simply dis-

over, it the whole militia force is needed to do it.

"The exhibition of to-day was simply disgusting. If the men had not been encouraged in it, if the fear of punishment for breach of discipline had been constantly before them, they would never have been so bed as to make such a show as they did when I took my denaiture. I hope, for the credit of the officers, that no revolvers will be found. It is a lamentable state of affairs, indeed."

Messages were sent to the Wardens of State prisons at Albans, Concord, and Hartford, in quiring about their management. The answers indicated that the convicts were not allowed to talk at will or gather in groups, play cards in their cells, collect subscriptions among their number, or refuse to work when the fancy seized them, as is the case at Charlestown.

The last attempt was made to-day by a cowboy named Pannell in the presence of some 300 spectators. Pannell, who came forty or fifty miles to try his prowess, was very confident of his ability to ride the frisky animal. He announced his willingness to bet \$50 that he could accomplish the feat. Rumor has it that the young man has been practising bull riding for several months.

To-day when he came on the grounds to make the trial he refused to risk his \$50, and chose to make an attempt for the standing wager. At 1P. M. the bull was led out weat of town with two long ropes on his head, with six to eight men holding to each rope. The crowd gathered mostly upon the lumber yard near by, where they might witness the performance. The bull was telindfolded and the work of sadding him commenced. The bull not being entirely satisfied with the programme, cut up a few antics and delayed the operation, but soon he quieted down and the saddie was adjusted to the satisfaction of Mr. Pannei, who at once mounted.

When his feet were well in the stirrups and one hand elasped ine tuekstraps in the front and the other in the rear of the saddle the word was given and the bilnd was taken from the bull's eyes. Then the fun becan and about the second or third jump the rider landed in the snow, an easy fail, without bruite or blood. The shout that went up from the specialors could have been heard a half mile, and Pannell retired from the scene, a sadder and wiser man. The animal will be taken to the Columbian Exposition.

also President of the University Settlement Society, introduced Dr. Colt and expressed his wish that some students of the college might wish that some students of the college might care to study under Dr. Coit's leadership the great problem of city life, which was presented in its fullest view by the work of the University Settlement Society. The mon must come to the work. President Low said, willing to give their labor to the poor, as well as in the hop of learning of their needs and condition.

19: Coit described with great earnestness the poverty and degradation of the classes in this city in which the University Settlement Society is working. Poverty, he said, cannot be dealt with by those who stand on the outside and study the conditions or the poor from that viewpoint. Men and women are needed to go down and dwell among the people, to learn properly how the question of the amelioration of their condition can be dealt with. These must be men of learning and cultivation who can study the statistics and facts of the situation and teach the people among whom they live a humane standard of life.

The problems of city life, Pr. Coit said, have reached that stage when they can only be treated by scientife thinkers. For this reason the University Settlement Society desires college graduates and tenchers to cooperate in its work. Dr. Coit said that many plans of social reform had failed either because their promoters were scientific men ignurant of the actual needs of the poor, or men knowing the needs of the poorer classes, but destitute of the scientific equipment which is indispensable to a successful result of any scheme of reform. care to study under Dr. Coit's leadership the

PEALED IN ANY EVENT.

Gov. Werts Using His Influence to Prevent the Bill Curtailing Mayor Wanser's Powers from Being Passed Over Ilis Veto. TRENTON, March &-What many considered to be the last gasp of the struggle to pass the racing repealers was heard in the House toenlist the sympathies and active co-operation | day. Mr. Holmes of Hudson moved to relieve the committee that has possession of the re-pealers of their further consideration, and the motion was lost by a vote of 28 to 31. There was no debate whatever. There is another set of repealers in the Senate and they may pass there, but they can go no further. The House committee which agreed to sit to-day to hear further arguments against the repealers did not do so, alleging want of time. The race

track men did not complain, however. The less the committee does the better the Duke of Gloucester and his friends will be pleased. There will a caucus to-morrow to fix upon the day and hour for final adjournment, and the belief is now that Saturday noon will see the end of the session. That the break up is close at hand is evidenced by the large num-

ber of bills appearing.

The afternoon session of the Senate was the briefest one on record. It lasted just one minute by the clock. The calendar was loaded with blils, and a three-hour sitting was looked for. Immediately after roll call Senator Daly of Hudson arose to call up his bill to curtail the powers of Mayor Wanser of Jersey City. This is the bill that Gov. Werts has vetoed. and that the Democratic Senators in caucus decided to pass over the Governor's head. Senator Daly sits only a few yar's from President Adrian's chair, and although he made the notion to take the bill up in loud tones and repeated it. he failed to make the President hear him. Senator Barrett of Essex sits a good deal further away from the President than the Senator from Hudson, but his motion to adjourn was heard by the President and instantly put and carried. The incident deprived Senator Daly of his breath for a second or two. When he tecovered he had something to say to his colleague from Essex.

Bob Davis and Commissioner Cook of the Jersey City Board of Public Works also berated Senator Barrett. They threat-ned that his kills should be black isted, and that when the great electric railway scheme in which he is interested should come before the Jersey City Board of Works it should "stick" there for want of help.

It seems that although the Senators caucused on this bill and decided to overries the Governor, they want to back out. The Governor, they want to back out. The Governor has himself taken a hand in the matter, and it is believed that his was the influence that prevented the bill from being taken up to day. The Democratic leaders are more or less at loggerheads over several bills, and unless they agree upon them in to-morrow's caucus final adiournment may have to be post-poned for a week.

Senator Daly had a bill passed to allow cities to enter into contract with railroad companies to change grades, clayste tacks, &c. Now there is pulling and hauling by one set of leaders to have sow were sign the bill and by another to have him kill it. The object of the hill is no allow the West Shore Railroad Company to initid over the tracks of the Pennsylvania at a point near Jersey City. The Lennsylvania is a fighting the scieme. The matter is in the course, and another bill in the Governor's hands for his approval or veto is to squelch this litigation. This bill is also a bone of livoly contention. and that the Democratic Senators in caucus decided to pass over the Governor's head.
